VERIDION
INTERNATIONAL LTD.

COMPANY PROFILE

Infrastructure, *with foresight.*

An international outlook. A practical approach.

Veridion International Ltd. supports enterprises with AI hardware sourcing, procurement coordination and system integration. We connect project requirements with the right equipment, suppliers and delivery approach.

Our scope also includes GPU equipment investment and leasing, with an emphasis on the practical relationship between ownership, deployment and ongoing use.

INTERNATIONAL LTD.

OUR EXPERTISE

One connected perspective.

01 Global sourcing & procurement

Global RFQs, supplier sourcing, price and specification comparison, and procurement and delivery coordination.

02 System integration & delivery

Requirements and configuration planning, hardware and network integration, project coordination and handover.

03 GPU investment & leasing

Equipment acquisition and ownership, project-based equipment leasing, and coordination of deployment and resource-use rights.

04 AI computing enablement

GPU infrastructure planning, computing resource and rental coordination, and infrastructure for AI applications.

INFRASTRUCTURE SCOPE

GPU & compute / Memory / Enterprise storage
Networking / Data center components
